Super hero tycoon games

December 15, 2015 4 min read This story originally appeared on Lewis Howe's Journey of heroes can take place on a battlefield or in a cabin. We can live it out in the midst of the public shouting or in the silent vault between our ears. The demons we duel are always the same. It is our own fears of becoming who we are. No one who has ever lived – or will ever do – has a journey like ours. And yet our journey is universal. It is that of every woman and every man. –Steven PressfieldDid you know you're the hero of your own story? Life live behind the eyes, you are the protagonist, and you are the author. Some might say that they are the co-author with fate or with your higher power. You may have understood this at some point in your life, and circumstances have stood in the way of your ability to see clearly that you can still run your own ship. You see, on the journey of every hero or heroine, the hero is lost. The hero almost dies. The hero wants to give up. It is an essential part of the journey, in fact. If you are lucky, find your way back quickly, or after a little time. Some people get lost for so long that they forget what it was like to be themselves. You know the people who once went in full force, but are now sagging under the weight of their disappointments and losses. Sometimes the pain in life can seem too much to bear, and there are those of us who suffer harder, perhaps even feel deeper. Pain is inevitable, but suffering – the story we tell ourselves about pain – is optional. We are all heroes and heroines, either following the call of our highest self or not. We will certainly be lost if we do not respond, and we will most likely find our purpose if we do. That is only part of the process. Sam Raimi said: When we read stories of heroes, we identify with them. We take the trip with us. We see how the obstacles almost overcome them. We see them grow as human beings or gain qualities or show great qualities of strength and courage and with them we grow in a small way. We all have a unique gift that strives to come to life within us, and that is the call. After the call is answered, the inauguration comes. The initiation we are going through includes the trials, the leaps of faith, the measures we must take to get to the work we are supposed to do. This manifests itself in the form of all the risky things we want to win or achieve. If we want love and romance, we must seize an opportunity to hurt ourselves and trust the process of relationship. When we start a business, we need to take a step move the other towards our vision, often with failures after failures that are on the verge of success. During the inauguration, you must persevere. If you persevere and do not give up, you will emerge after you have grown, stretched, and expanded. You will have found something precious and unique that you can give to the world. Being the hero of your own story means stepping back from the overwhelm of every moment and seeing that every journey has ebb and flow, up and down. Don't wait someone to save you. Save yourself. Enter your power and become a hero or heroine of your own life. Subscribe to iTunes, Stitcher Radio or TuneIn January 22, 2007, 9:56 PM UTC Whether they are noble, courageous icons that inspire everyone to be the best person they can be, or just badass warriors cutting armies of villains to protect the innocent, the various protagonists of the video game world have become shining symbols of heroism in the entertainment industry. Jade is a living example of the power of tenacity. Although she lives in a world where very little goes her way – her planet is besieged by aliens, and she has been orphaned since birth – Jade has managed to create success for herself thanks to her willpower and resilience. Starting with a pure photo business, Jade would finally unravel the secret behind the relationships between the invading DomZ and the supposed protectors of the planet, the alpha sections. What makes Jade so cool is that she never gives up. Even in the face of all the challenges that life has thrown into her path, Jade is adamantly coming out on top. See Xbox Store 9. Leon Kennedy (Resident Evil Series) When the US President's daughter, Ashley, was kidnapped by the sinister Los Illuminados cult in Spain, Leon Kennedy was tasked with recovering her. What Leon found when he reached their place was an army of people infected by the parasite called Las Plagas. Looking at hordes of infected people, wolves and other terrifying creatures, Leon somehow managed to find, secure and eventually save Ashley and evacuate the area. Despite the fact that most of the monsters he encountered would traumatize anyone (even if he was injected with the parasite at one point), Leon was able to stay cool, calm and collected when he found a way to heal himself and fulfill his mission. His commitment to his duty and his courage in the face of the terrors like this one is commendable. See Xbox Store 8. Marcus Fenix (Gears of War Series) Marcus Fenix is one of the most notable examples of a professional soldier in video game history. Year after year of fighting the Locust threat, Marcus' long history of service has led to an insurmountable amount of loss. Most of the things that mean something to Marcus come from the war wounded at best and dead at worst. This repeated experience of loss has made Marcus a cold, introverted individual. Nevertheless, his talent as a natural leader and his ability to continue fighting and fight after all that has happened around him, strengthen his abilities as a warrior and his remarkable stamina, both physically and physically. See the Xbox Store 7. Carth Onasi (Star Wars: Knights of the Old Republic) Carth is similar to Marcus Fenix in many ways. Both are part of great, protracted wars, both have suffered some loss, and both have the strength and perseverance to carry on and continue. But where Marcus is a closed closed Carth is an open book. In the course of the Knights of the Old Republic you have several opportunities to talk to Carth about his experiences in the war between the Sith and the Old Republic. I always found it fascinating to see Carth's views; In Star Wars, we are rarely familiar with the opinions, beliefs, and experiences of the common foot soldier. This doesn't make him objectively better than Marcus, but Carth's character still fascinates me more. When you combine Carth's willingness to speak his mind with his resilience and devotion to duty, you have a character who feels very much like a real person, not a fictional one. Note: Star Wars: Knight of the Old Republic is incredibly rare and expensive to buy new ones. However, it can be easily used, or you could buy it on Steam for 9.99 USD. 6. Artyom Chyornyj (Metro series) If a word was used to describe Artyom, it would undoubtedly be 'brave'. Artyom is many things, but above all he is courageous. Artyom wants to venture into the endless darkness of the subway tunnels as well as into the rough, radiant wasteland of Moscow on the surface and puts everything on the line to prevent the supermutants known as the Dark ones from killing everyone under the city. But it is also reasonable and honourable. As soon as he learns the truth about the Dark Ones, he immediately regrets having destroyed their house and undertakes to protect the lonely survivor, only one child. See the Xbox Store 5. Commander Shepard (Mass Effect Series) Commander Shepard is a cocktail of charisma, intelligence and dexterity. There is no enemy he cannot defeat, no leader he cannot convince, and no problem he cannot solve. What really catches Shepard's attention, however, is his amazing ability to connect with the people around him. Shepard understands that you have to be interested in your subordinates in order to command effectively. During the Mass Effect trilogy, Shepard has close relationships with his entire crew that would have lasted a lifetime – had it not been for his ultimate sacrifice to stop the Reapers. See On Amazon 4. Lara Croft (Tomb Raider series) When Tomb Raider was released in 1996, Lara Croft was one of the first female characters in gaming to command to raise a gun and hand out the pain herself. Unlike most female characters in the industry at the time, Lara Croft was a wild, independent character who wasn't afraid to go on her adventures. What makes Lara, of course, a heroine is her undeniable urge to fight for the power of good. During her many, many adventures over the years, Lara repeatedly resists all the villains she encountered during her expeditions. See Xbox Store 3. Ezio Auditore Da Firenze 'Creed series) Ezio is considered one of the most remarkable members of the Assassins, and for good reason. He devoted almost his entire life to stopping the Templars. During his As an assassin, Ezio saved Venice, Florence and Rome from doom under the control of the Templars, almost entirely alone. The ideals of independence and freedom that are dear to the assassins would not have spread in Italy during the Renaissance if it had not been for his deeds. Although he did everything he could do in his lifetime, Ezio still died to do more. His selflessness and commitment to the assassin's cause have not gone unnoticed. See the Xbox Store 2. The Arbiter Thel 'Vadam (Halo series) Of all the characters on this list, none show more strength than Thel 'Vadam, mentally. Although he devoted his entire life to the covenant and his religion, he was strong enough to cast aside the Great Journey as a lie when he discovered that it was false. This was undoubtedly a monumental challenge for him, and the fact that he overcame it is proof of the power of his will. Thanks to his ability to accept the truth, a halo ring was prevented from shooting, and Vadam himself would deal the final blow to the league weeks later. His deeds are equated and perhaps surpassed only by the master chief himself. See the Xbox Store 1. Master Chief (Halo series) The Master Chief is undeniably one of the most famous and iconic characters in video game history. In fact, over the years, the titan-clad supersoldier has left a pretty exemplary legacy and saved humanity countless times in the war against the covenant. The reason Chief is the number one pick is that he has seen almost every quality in heroes. Strong, independent, resilient, intelligent and engaged are all terms that can be used to describe John-117. Like Marcus Fenix, he's mostly introverted, but that's okay. We don't need Chief to be open or talkative. Everything we need to know about the man in armor is shown to us by his deeds. See your thoughts in the Xbox Store What do you think of the list?
